

S & K TV Systems

Cable Box/Remote Operation instructions

High Definition Box (TVS 5000)

Operation:

Turn on TV and Cable Box.

Tune the channel number using the number pad or channel up/down buttons. Refer to printed listing on back of this card. *Optional: Press Guide or OK button to access Program Guide or Channel listing. Choose your channel by navigating through guide or channel listing. Hit select to tune channel. (You can hit exit at any time to stop navigation and tune the channel number using the number pad or channel up/down buttons.)*

Trouble shooting:

TV is on but there is no picture:

No lights on cable box – Make sure box is plugged into a working power outlet.

Turn box on using power button on the front left corner of the box.

Time and flashing red light on cable box – Turn on cable box using “Cable” power button on remote.

Program # & solid red light & flashing green light on box – Check to see if coax connector is

Connected tightly to wall outlet and RF input on box.

Program # & solid red & green lights on box – Verify TV is on the correct video input (_____) use

Input button on the remote to cycle through available inputs.

Check HDMI (or 5 wire Component) connection from cable box to TV for tightness.

Replace cables if necessary.

TV has a frozen picture (or you have verified the steps above and still have no picture):

Power cycle the cable box – Turn the cable box off using the power button on front left corner of box.

Leave off for 30 seconds.

Turn the Cable box on using the power button on front left corner of box.

Allow 1 minute to start up.

Allow 30 minutes for all guide data and program information to reload.

If you are still having problems contact our office at 1-800-924-7880.
